The DDSG tug "KRONSTADT" left Vienna towing the DDSG tank barge with 780 tons of diesel-oil for Reni, and the SRED tank barge with 530 tons of diesel oil for Budapest. This oil is being used 50X1-HUM for re-fuelling DDSG, SDGP, and SRED tugs in Budapest and Komarom. In 50X1-HUM Budapest the "KRONSTADT" collected the barges all loaded with bauxite for Ismail, USSR. 2. The DDSG tug "VLADIVOSTOK", coming from Rumania, delivered the following tank barges to the Bratislava refinery 50X1-HUM with 860 tons of lubricating oil with 740 tons of lubricating oil with 860 tons of lubricating oil. 50X1-HUM tank barge tank barge tank barge Grews of Czech and Rumanian tank barges are not permitted to travel to Vienna at present; DDSG crews take over the barges in Bratislava, take them to the Lobau refinery for loading and subsequently return them to their crews in Bratislava. 50X1-HUM the following goods were stored in the SDGP stores in Vienna for transport to Hungary, Rumania and the USSR in SDGP barges: about 20 railroad car loads of electric bulbs: cables on drums with a diameter of about 2 meters; b. new oak barrels (to Rumania and Hungary): 50X1-HUM CLASSIFICATION SECRET/CONTROL - U.S. OFFICIALS ONLY STATE NSRB DISTRIBUTION ARMY AIR XX FBI

7. A salvaged self-propelled tanker is at present being repaired in Korneuburg. The tanker is being lengthened by 15 meters and is to be used in the Black Sea. 8. Three paddle ships, with diesel-engines, are at present being constructed in the new shippards in Komarno. The ships are about 60 meters long and have one short funnel. They are to be used for passenger and goods traffic on the new Don-Volga canal. One of the ships is already finished, the other two are being fitted out. 9. A salvaged tug of the DIMITROFF class, which had been repaired in the 50X1-HU Rutstschuk shippards was taken for a trial run During the night after the trial run, the tug was completely destroyed by fire. Sabotage is suspected by the authorities. 50X1-HU 10. two new paddle steamers (of the type which have a funnel which can be lowered to the side) were standing in the Obuda shippards in Budapest ready for service. Thirty-five steamers of this type have already left the Obuda shippards for the USSR. They are being used on the Dnjepr. 11. The bridge across the harbor in Komarom has been raised by 4 meters to enable bigger craft to enter the harbor. In spite of this, the mail boat was not able to pass under the bridge in view of 50X1-HU the high level of the Danube. 12. Work on the new Danube bridge in Giurgiu has been started. 50X1-HU 13. A new double pipeline between Ploesti and Odessa was completed	Sanitized Copy Approved for Release 2011/04/13 : CIA-RDP82-00457R013000070010-3	
5. Four new sea-lighters are at present being constructed in the Korneuburg shipyards. 6. the SDGP tug "KRASNOVODSK" left Vienna for the USSR 50X1-HU with three new sea-lighters are destined for service in the Black Sea. 7. A salvaged self-propelled tanker is at present being repaired in Korneuburg. The tanker is being lengthened by 15 meters and is to be used in the Black Sea. 8. Three paddle ships, with diesel-engines, are at present being constructed in the new shipyards in Komarno. The ships are about 60 meters long and have one short funnel. They are to be used for passenger and goods traffic on the new Don-Volga canal. One of the ships is already finished, the other two are being fitted out. 9. A salvaged tug of the DIMITROFF class, which had been repaired in the 50X1-HU Rutstschuk shipyards was taken for a trial run During the night after the trial run, the tug was completely destroyed by fire. Sabotage is suspected by the authorities. 10. two new paddle steamers (of the type which have a funnel which can be lowered to the side) were standing in the Obuda shipyards in Budapest ready for service. Thirty-five steamers of this type have already left the Obuda shipyards for the USSR. They are being used on the Dnjepr. 11. The bridge across the harbor in Komarom has been raised by 4 meters to enable bigger craft to enter the harbor.
